

LAB INTEROPERABILITY COOPERATIVE (LIC)

Track your Progress

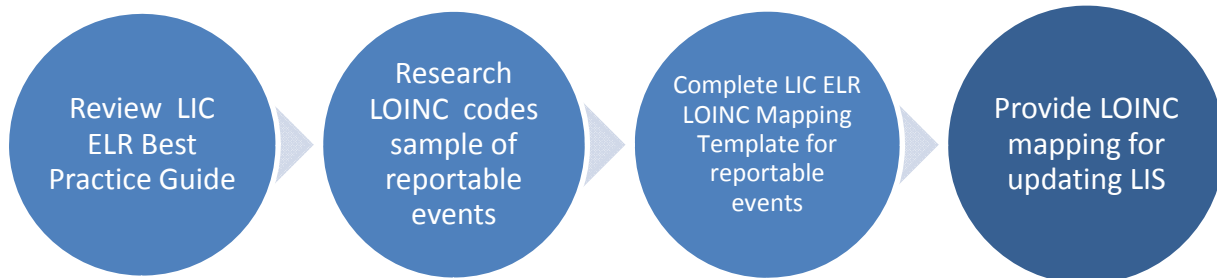

Achieving success in Electronic Laboratory Reporting (ELR) is our goal. The LIC services include an online education portal that hosts a dedicated account customized for facility needs and built around a self-reporting tool to track progress toward ELR.

The LIC is prepared to provide assistance with two primary services to assist you with ELR –

1. LOINC Mapping Guidance; and
2. Connectivity-Transport services

Each participating facility can opt for one or both LIC services depending on current needs. Both solutions have specific progress milestones geared toward moving participants through to successful electronic submission of public health reportable.

LIC LOINC Progress Milestones*

LIC participants have access to online resources including tracking of progression (✓ check off) through LIC LOINC milestones.

Connectivity and Transport Milestone

Because of the variety of transport methods available, the LIC has one primary milestone for tracking –

- ✓ Verify Vendor/IT has extracted and pushed message to Public Health jurisdiction

For more information on participation, tracking or requirements, please contact the LIC @ Info@labinteroperabilitycoop.org

*The LIC has identified these milestones as a recommended approach to achieving ELR; it is not required to follow these exact steps.
